

RYDA Sample Booking Rules & Fair-Use Policy

Document status: redacted sample draft for review only. Version: sample v0.1 Last updated: 2026-05-19

This policy explains how shared use is allocated among members. Final rules may vary by asset, market, and insurance requirements.

1. Booking Entitlement

Each member receives booking access based on share count. Entitlement is shown in the member portal and administered through the shared calendar.

2. Peak Windows

Peak windows are allocated so one member cannot monopolize the most desirable dates. RYDA may limit repeat peak bookings until each member has had a fair opportunity to reserve.

3. Advance Bookings

Members may request planned bookings in advance through the portal. Conflicts are resolved using share count, prior usage, peak-window history, and the final Operating Agreement rules.

4. Short-Notice Bookings

Short-notice bookings may be available when the asset is unreserved and service status permits use. Short-notice bookings do not override confirmed planned bookings.

5. Cancellations and No-Shows

Late cancellation, repeated cancellation, and no-show treatment is governed by the final policy. RYDA may apply calendar restrictions or reserve charges when member behavior harms other members' access.

6. Handover and Return

Members must complete handover and return steps, including photo documentation, fuel or charge status, mileage or hour recording, and damage disclosure.

7. Guests and Additional Drivers

Only approved drivers or operators may control the asset. Guest access must comply with insurance requirements and the Operating Agreement.

8. Prohibited Uses

Prohibited uses include racing, track use unless expressly approved, ride-share or unauthorized commercial use, intoxicated operation, lending to unapproved operators, and operation outside approved territory.
